MODULAR PHARMACY SYSTEMS

Dispensary systems

Integrates with:

## Engineered for pharmacy efficiency.

**The pharmacy world becomes easier with Ultradeks range of pharmacy dispensary storage systems.**

The Ultradeks pharmacy storage range includes counter roller drawer systems, dispensary roller drawer systems, specialist script waiting roller cabinets and can be easily and quickly tailored to meet your current and ongoing requirements as your pharmacy needs change.

This highly efficient, cleverly designed range incorporates the highest quality components in a simple and cost-effective solution for all pharmacy dispensing and storage applications. Ultradeks pharmacy systems are precision engineered for solid, reliable performance over the long term in even the busiest pharmacy environments.

Ultradeks pharmacy drawers have been developed with the complex requirements of modern pharmacies in mind. Each roller drawer is completely retractable, and incorporates the innovative roll stop system.

Crafted with top-of-the-line Shoptec components from Germany, Ultradeks pharmacy drawers incorporate mesh bases to allow visibility of stock in drawers above head height. For safe and convenient access to high drawers, a unique pull out step can be integrated into the system.

Ultradeks pharmacy drawers are precision engineered for solid, robust performance.

Ultradeks dispensary roller drawers come with a world first, patented soft closing mechanism. This automatically slows drawers when they are closed and prevents drawers from bouncing back and reopening, as well as keeping contents from being dislodged.

### A complete Ultradeks pharmacy solution

The Ultradeks pharmacy system is complemented by the Ultradeks retail system, which is a modular, high-density product shelving system, perfect for your pharmacy retail needs. Based on the same high quality components and European design, the Ultradeks retail wall bays and gondola bays are solid and robust modules which are easily reconfigured by your own team as your needs change.

When integrated business performance and intelligent style are the primary objectives, Ultradeks pharmacy drawers are the solution.
