MODULAR RETAIL SYSTEMS

≡ Retail gondolas & shelving systems

Integrates with:

PRESAFLEX
AUSTRALIA
MODULAR RETAIL SYSTEM

SECURODEKS

Engineered for retail efficiency.

Until now changing your retail fixtures or relocation meant significant downtime and money, and the requirement for professional, customised shop fitting. What if you could change your retail environment within minutes or a whole store within a day, simply and cost effectively.

Using the high quality, precision engineered Ultradeks retail display system of wall bays and gondola bays, you can continually refresh the look and feel of your retail space to create a retail point of difference.

≡ Simply Easier

The Ultradeks modular retail system, built in conjunction with Shoptec of Germany, is a shop shelving and display merchandising system designed to suit all types of retail environments, including pharmacy, department stores, consumer electronics, big box and boutique retailers. Ultradeks is perfect for high density product shelving needs, such as pharmacy and FMCG retail environments. Whether you need a wall of vitamins today, a gondola of beauty products on glass shelves tomorrow, or a shoe display next week, you can quickly and easily adapt your Ultradeks system to suit these changing shop display needs.

Ultradeks opens up a range of shopfitting and merchandising possibilities that is only limited by your imagination. Ultradeks allows you endless configurability to create your retail point of difference as often as you like. Individual wall bays, gondola bays and free standing frames can be changed within minutes, or you can recreate a totally new, unique environment across your whole store within a day without the need for a major refit. The sturdy and robust Ultradeks system is assembled using an ingenious 'click clack' system; modules simply lock into place without the need for tools or skilled labour.

Whatever your environment, the Ultradeks modular retail system can play a vital role in creating effective, dynamic display solutions.

Features:

- Build basic to complex configurations
- Wall bays, gondola bays and free standing frame displays
- Large illuminated panels, graphics and colours available
- Frames can be exposed or hidden behind panels
- Variety of fixtures available, including metal and glass shelves, hanging hooks, drawls and baskets
- Option to add custom made pelmets and plinths
